

ROVENSO is an EPFL startup, developing agile robots for security and safety monitoring of industrial sites.

We are a team of 8 people and we are looking for people that are curious, not afraid of making mistakes, autonomous and collaborative, able to work with multiple priorities in a fast-paced, multi-cultural, multi-disciplinary environment

Every day, you will have the opportunity to innovate, experiment, share your ideas and contribute to solving the most challenging real-world robotics problems.

So join us as

Robotics Internship - Mechatronics

Starting date: As soon as possible

Your role:

- Designing and improving mechanical and mechatronic modules
- Perform on-field testing of new modules
- Fix, improve, document

Your profile

Highly motivated student, with hands-on experience in the field of machine design.

Your required skills:

- Excellent CAD skills
- · Experience in machine design
- Basic knowledge of mechatronics (electronics, control, sensors etc.)
- Hands-on experience of mechanics
- Inventive, practical, very comfortable with mechanical tools
